Run Cerner SW App	✓	✓	✓
	Deployed successfully in West Suffolk, Paris & Qld Health Townsville (& soon Mackay) hospitals		
Standard Full Warranty	2 years	1 year	1 year

- NOTES:**
- Fans in devices are not hygienic as they spread germs in a room, a negative for hospital and healthcare environment. Fans are also prone to noise in time. Vents allow dust and humidity to enter the unit causing corrosion to the internal electronics board and limiting the life of the unit.
  - Devices with moving parts are likely to fault sooner and cause unnecessary outage and maintenance disruption. Such devices are less robust with a reduced life span.

\* Based on research conducted including information on official company websites, technical specification sheets, publications and physical inspection of various medical devices used in the Medical industry.
